Ranked best in Management research among 2nd and 3rd generation IIM's

Trained more than 2000 executives from public and private sector last year

About Project Management

The Project Management course offers a comprehensive overview of Project Management from renowned faculties of India's premium college IIM – Rohtak. Designed exclusively for working executives or fresh graduates, the course provides a broad understanding of the project management concepts, principles, and tools.

The programme, by focusing on various stages of planning, designing and managing projects, prepares candidates to adapt themselves to the constantly emerging demands of the industry. A major strength of the course lies in the takeaways including appropriate skills, knowledge, tools and techniques that later help candidates in mastering the projects with a clear focus on time, budget, and quality.

While the individual development is nurtured and supported through innovation, experimentation, and exploration, the curriculum of the course equips learners with necessary skillsets to manage projects leveraging applied advance project management software.
